Step 5:

Nomination of Four International Experts

You are required to nominate four experts in the subject of your article. These experts:

- at least two of them must be from a different country to you*
- these two must have institutional email addresses (i.e. not free public email addresses)
- must not be from your* institution
- must not be members of any Inderscience journal editorial board
- **must have valid and working email addresses (verified by you *)**

We will not process your article if your entries are not experts in the subject of your submission, or if the email addresses entered are not valid.
The purpose of this request is to ensure your familiarity with the latest research literature in the field and to identify suitable experts who can be added to our Experts Database. They may be asked if they are willing to review articles for Inderscience journals; we are unlikely to ask them to referee your article.

(* "you" and "your" refers to all authors of the article).
